Dayton, USA | 326 467 0029 | amruthrajbitla@yahoo.com | **Boldd_Polio**
Work Authorization: F-1 OPT (EAD in Hand). Eligible for 24-month STEM Extension.

PROFESSIONAL SUMMARY

[1V] Software Engineer with 4+ years of full-stack development experience, specializing in designing scalable, high-performance systems and end-to-end software solutions. Proven expertise in architecting robust application frameworks, developing modern web applications, and integrating complex systems using technologies such as Python, SQL, and front-end development frameworks. Experienced in translating business requirements into technical architecture, leading system design decisions, and ensuring scalability, security, and maintainability across applications. Adept at problem-solving, algorithmic thinking, and applying software engineering best practices throughout the development lifecycle. I am currently pursuing a master's degree in computer science, enhancing expertise in Algorithm Design. Recognized for professionalism, adaptability, and a strong work ethic, with the ability to excel in fast-paced, collaborative environments.

TECHNICAL SKILLS

Programming: Full Stack Development, Django, Flask.
Core CS Concepts: Data Structures and Programming language, Object-Oriented Programming.
Data Engineering & Processing: Apache, ETL Pipelines, Batch & Streaming Systems.
Data Science & Machine Learning: Matplotlib, Pandas, NumPy, Scikit-learn
Data Processing: Apache Spark, Distributed Data Processing, ETL, Batch & Streaming Pipelines
Databases: MySQL
DevOps & CI/CD: Docker, Git, GitHub, GitHub Actions.
Operating Systems: Linux, Windows, Linux (CERT)
Software Engineering Practices: SDLC, Agile/Scrum, Integration Testing, System Analysis
Security: Ethical Hacking, Web Application Security.

PROFESSIONAL EXPERIENCE

JR Software Engineer

Promisive Technologies, Hyderabad Jun 2019 – July 2023

- Develops information systems by designing, developing, and installing software solutions.
- Determines Operational Feasibility by Evaluating Analysis, Problem Definition, Requirements, Solution Development and Proposed Solutions.
- Develops Software Solutions by Studying Information needs, conferring with users, and studying systems flows, data usage and work processes.
- Investigates Problem Areas.
- Follows the Software Development Lifecycle.
- Documents and Demonstrates solutions by developing documentation, flowcharts, layouts, diagrams, charts, code commands and clear code.
- Prepares and installs solutions by determining and designing system specifications, standards, and programming.
- Improves operations by conducting systems analysis and recommending changes in policies and procedures.
- Obtain and licenses software by obtaining required information from vendors, recommending purchases, and testing and approving products.
- Protects operations by keeping information confidential.
- Provides information by collecting, analyzing, and summarizing development and service issues.
- Accomplishes Engineering and organization mission by completing related results as needed.
- Collaborated with clients to define solution requirements.
- Developed next generation integration platform for internal applications.

- Optimized dust, temperature, and humidity controls for installed systems.

Software Intern

Info-Web Technologies, Hyderabad, Telangana, India
Sep 2018 – Feb 2019

- Utilized web development technologies to create dynamic and responsive websites, including scripting and testing phases.
- Collaborated with team members to brainstorm and implement innovative design solutions.
- Conducted rigorous testing procedures to ensure functionality and user-friendliness of websites.
- Actively engaged in refining coding practices and staying updated with the latest industry standards.
- Contributed creatively to the design and functionality of various web projects, enhancing user experience and client satisfaction.

RELAVANT EXPERIENCE

- Administered background checks and fingerprinting while ensuring student information privacy.
- Utilized Google Suite (Sheets, Drive) for data organization and communication within a professional setting.
- Assisted with sorting, cataloging, and managing physical and digital assessment data and department files.
- Assisted in organizing and updating digital and physical resources, like cataloging tasks in library settings.
- Experience working with data management tools, which align with maintaining accurate catalog records.
- Familiarity with the Library of Congress classification system and cataloging best practices.

EDUCATION

Master of Science in Computer Science

University of Dayton, Ohio, USA Jan 2024 – May 2026

Bachelor of Technology in Computer Science

Guru Nanak Institute of Technology, Telangana, India
Jun 2015 – May 2019

CERTIFICATIONS

- Google Cloud Associate Cloud Engineer
- Ethical Hacking & Web Security Training
- Linux System Administration Training
- TryHackMe Cybersecurity Trainer
- Cisco Networking Academy
- Coursera Professional Development Certificates
- AWS Machine Learning Foundations
- Operational Linux Certification.
- Google Cybersecurity Professional Certificate
- University-Issued Academic and Technical Certificates.

AMRUTTHRAJ BITLA

Dayton, USA | 326 467 0029 | amruthrajbitla@yahoo.com | **Boldd_Polio**
Work Authorization: F-1 OPT (EAD in Hand). Eligible for 24-month STEM Extension.

PROJECTS

E-Commerce Web Application (Django) | Stunbuy.com

- Developed a full-stack e-commerce web application using Python and Django framework.
- Implemented user authentication, product catalog, shopping cart, and checkout functionality.
- Designed backend database models for products, orders, and user management.
- Built responsive UI for seamless user experience across devices.
- Integrated Django admin panel for product and order management.

Pizza Ordering Web Application (Django Full-Stack)

- Built a full-stack pizza ordering web application using Python and Django.
- Implemented menu listing, cart system, order placement, order tracking features.
- Developed backend APIs and database models for orders, users, and products.
- Integrated dynamic frontend templates with Django views for interactive UI.
- Project repository: **GitHub**.

Sustainable Procurement & Environmental Impact Management Platform (Software Web Application)

- Developed a software web application focused on sustainable procurement and environmental impact management for producer companies.
- Designed and implemented tools to track and visualize procurement-related sustainability metrics, including carbon footprint reduction, water usage optimization, and community development initiatives.
- Built features to monitor environmental and social impacts associated with production and procurement activities, enabling data-driven decision-making.
- Developed dashboards and reporting modules to provide insights into carbon emissions, water consumption, and sustainability performance indicators.
- Integrated procurement workflows with sustainability tracking mechanisms to support responsible sourcing and compliance objectives.
- Collaborated on sales-oriented implementation requirements tailored to company-specific procurement and environmental reporting needs.
- Conducted project analysis, system design review, and software implementation planning for sustainability-focused business operations.
- Project repository: **GitHub**.

Web Application Programming and Hacking – Secure Web Development & Serial Hacking

- Participated and also Teaching Assistantship in advanced Web Application Programming and Hacking coursework under the guidance of Dr. Phu Phung.
- Developed hands-on experience in secure web application development, web security testing, and vulnerability assessment techniques.
- Completed laboratory exercises covering web technologies, front-end development environments, PHP/MySQL application development, and secure session-based authentication systems.
- Performed practical security assessments involving Cross-Site Scripting (XSS), SQL Injection, Session Hijacking, and Cross-Site Request Forgery (CSRF) attacks and defenses.
- Built and maintained a professional profile website with API integration and cloud deployment as part of individual project requirements.
- Developed full-stack web applications utilizing secure software development principles and industry-standard security practices.
- Applied ethical hacking methodologies to identify, analyze, and mitigate web application vulnerabilities.
- Gained experience with Python, PHP, JavaScript, Django, Git, Linux, Postman, and modern web development technologies.
- Contributed as a Student Grader while maintaining and organizing course-related code repositories and project deliverables.
- Repository: Work & Projects **GitHub**.

Security Audit & Incident Response Simulation Platform

- Completed a cybersecurity project focused on security operations, risk assessment, incident response, and threat detection methodologies.
- Conducted security audits and vulnerability assessments to identify potential security risks and recommend mitigation strategies.
- Applied cybersecurity frameworks and best practices to strengthen organizational security posture and compliance requirements.
- Performed log analysis, security monitoring, and threat investigation using industry-standard security concepts and tools.

- Implemented security controls and access management principles based on the CIA Triad, risk management, and defense-in-depth strategies.
- Analyzed common cyber threats, attack vectors, and security incidents while developing incident response and remediation procedures.
- Utilized Linux, network security concepts, security information analysis, and cybersecurity documentation techniques.
- Demonstrated knowledge of security operations, threat intelligence, vulnerability management, and cybersecurity governance.
- Project developed as part of the Google Cybersecurity Professional Certificate program.
- Repository: Work & Projects **GitHub**.
